Dear Readers,

It is with great pleasure and enthusiasm that I, Mohammed Saif, as the Editor-in-Chief, introduce the inaugural issue of the Emirates Journal of Internal Medicine (EJIM). As the steward of this journal, I am delighted to welcome you to our publication, which aims to serve as a beacon of knowledge and innovation in the field of internal medicine. In this milestone edition, we embark on a journey of exploration and discovery, embracing the diverse spectrum of research and scholarship that defines modern internal medicine. From the inception of EJIM, our vision has been to create a platform that transcends boundaries, bringing together researchers, clinicians, educators, and policymakers to exchange ideas, share insights, and catalyze progress in the field. In this inaugural issue, you will find a rich tapestry of original research articles covering diverse areas such as postoperative care and surgery, vaccinations and immunization, cardiovascular health, neurological disorders, women's health and reproductive medicine, Alzheimer's disease and cognitive health, mental health and addiction, and rheumatology. Each article represents a significant contribution to advancing knowledge and improving patient outcomes in their respective fields.

Thank you for joining us on this exciting journey. Together, let us pave the way for a brighter future in internal medicine.

Warm regards,

Dr. Mohammed Saif

Editor-in-Chief

Emirates Journal of Internal Medicine
